

CACA-ICPC SUMMIT

Theme: Artificial Intelligence, Psycho-Oncology, and Keeping the Person at the Center
Haigeng Convention Center, A201+A202, Kunming City, China
November 7th, 2025

Chairman: Ying Wang, CACA & Denis Horgan EAPM

Executive Chairman: Lili Tang

Scene Setting:

CACA-ICPC Summit 2025: Artificial Intelligence, Psycho-Oncology, and Keeping the Person at the Center

The *CACA-ICPC Summit 2025*, held on 7 November at the Haigeng Convention Center in Kunming, builds directly on the outcomes of the 2–3 September **Vision Europe 2030** Conference in Brussels, where ICPC and partners advanced key priorities on responsible innovation, patient-centred care, and strengthening health-system readiness. This Kunming session continues that work by exploring how artificial intelligence, psycho-oncology, and person-centred approaches can come together to ensure that no patient is left behind.

Featuring experts from Qatar, the United States, Europe, and China, the Summit showcases leading innovations, from compassionate, technology-enabled support models and advances in psycho-oncology for older adults, to precision psycho-oncology and the use of large language models in intelligent oncology. The program also highlights the FUTURE-AI guideline for developing trustworthy AI solutions in cancer care.

A concluding panel integrates ethical, clinical, and patient-experience perspectives, reaffirming the need to balance technological progress with compassionate, human-centred care. Co-funded by the European Union, the Summit aligns with the broader ambition of Vision Europe 2030 to advance equitable access to innovation, strengthen resilient cancer systems, and deliver meaningful improvements for patients worldwide.

Grounded in global collaboration and innovation, ICPC is committed to ensuring no patient is left behind.

Speakers & Moderators:

- **Muhammed Adnan Hararah**, *Qatar Cancer Society*
Topic of Presentation: Wayakum: Where Compassion Meets Innovation
Moderator: Denis Horgan, ICPC
- **Christian J. Nelson**, *Memorial Sloan Kettering Cancer Center*
Topic of Presentation: Transforming Depression Care in Older Adults with Cancer: Innovation in Psycho-Oncology Assessment and Therapy
Moderator: Lili Tang

Co-funded by
the European Union

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Health and Digital Executive Agency (HaDEA). Neither the European Union nor HaDEA can be held responsible for them.

- **Daniela Chieffo**, *Rome Catholic University of Sacred Heart*
Topic of Presentation: Precision Psycho-Oncology in the Age of New Technology
Moderator: Denis Horgan, ICPC
- **Bo Xu**, *Chongqing University Cancer Hospital*
Topic of Presentation: Asclepius' New Scalpel: Large Language Models in Intelligent Oncology
Moderator: Lili Tang
- **Karim Lekadir**, *ICREA & University of Barcelona*
Topic of Presentation: How to Develop Trustworthy Solutions for Cancer: The FUTURE-AI Guideline
Moderator: Denis Horgan, ICPC

11:40 - 11:55: Panel Discussion

11:55 - 12:00: Closing Remarks: Ying Wang & Denis Horgan
